New Extton Office

We're excited to announce that Moore Psychological Services is now MooreWays—a new name that reflects our expanded vision and growing commitment to mental wellness. Building on 13 years of trusted service in the community, we're proud to open a second location and broaden our offerings to include TMS Therapy and Gut Health Restoration alongside our expert Counseling services. As a comprehensive, integrative mental health clinic, MooreWays delivers leading-edge care with superior efficacy, proven safety, and lasting relief. We look forward to continuing to support your mental well-being with innovative and compassionate care.

Meet Our TMS Medical Director: Dr. M. Justin Coffey

Dr. Coffey is an innovative physician leader whose career efforts to improve behavioral health care have focused on the intersection of technology and improvement science. Before joining MooreWays, he served as Chair of Psychiatry and Behavioral Health at Geisinger Health System. Dr. Coffey holds board certifications in psychiatry, behavioral neurology and neuropsychiatry, and clinical informatics. He has been recognized as a Top Doc by multiple organizations, serves on the editorial board of multiple scientific journals, and has published in the fields of neuropsychiatry, brain stimulation, suicide, care redesign, and health technology.

What is TMS Therapy ?

Transcranial Magnetic Stimulation (TMS) uses gentle magnetic pulses to stimulate areas of the brain that regulate mood. This process helps restore healthier brain activity without drugs, surgery, or anesthesia. Treatments take place in a relaxed outpatient setting, and are well tolerated by most people. Many people start to feel relief from their symptoms in as few as 5 treatments with continued improvement throughout the course of treatment.
